BBDW22

ERRESONANTZIA

How do design and creativity vibrate and make us vibrate? How do they resonate in our daily lives? How can we promote the development of the creative ecosystem in terms of diversity, innovation, cooperation and sustainability so that it is more vibrant?

BBDW22, with ERRESONANTZIA, proposes an exercise in active listening and stimulation of the creative ecosystem of Bilbao and Bizkaia. The focus is on "the ECHO", as a vibrant acoustic phenomenon of listening and reverberation and as an allusion to the concept of "Resonance" by the sociologist Hartmut Rosa, as an attitude of profound listening, with the aim of enabling all the agents to speak with their own voices, in order to generate a common echo from the collective intelligence.

An invitation to observe how design and creativity are present in our lives, at home, at work, in our leisure activities, in the way we organise ourselves, in the products and services we use, in the small details. Paying attention to what we hear back from professionals and users and from the design itself, to recognise ourselves, to value ourselves and to think collectively about what we can do together.

BBDW (Bilbao Bizkaia Design Week) is a Bilbao City Council and Provincial Council of Bizkaia initiative to promote design and the creative industries as a factor of economic development and international projection of the city and the territory.

Exhibitions
